

SafeAccess™

NewCom's SafeAccess security appliance is ideal for corporate networks, rural locations, small branches and cybercafés that want to optimize their browsing experience while providing firewall security and intrusion detection/prevention for their users.

SafeAccess shares your existing NewCom Internet access with your Local Area Network, providing enterprise-class network perimeter protection and exceptional data throughput in an easy-to-manage, plug-and-protect security appliance.

Features and Benefits

SafeAccess enables secure local or remote configuration and administration through an intuitive GUI-based management console.

- Firewall protection
- HTTP Proxy for enhanced browsing experience, including:
 - Web Cache
 - Windows Updates Cache
 - URL filtering and Ad blocker
- IDS/IPS protects your network from hackers and known attacks
- Antivirus protection on file transfers
- Multiple reporting capabilities and SNMP
- Advanced network traffic and analysis
- Multiple VPN options (IPSec, OpenVPN, L2TP, PPTP) QoS and L7 Queueing

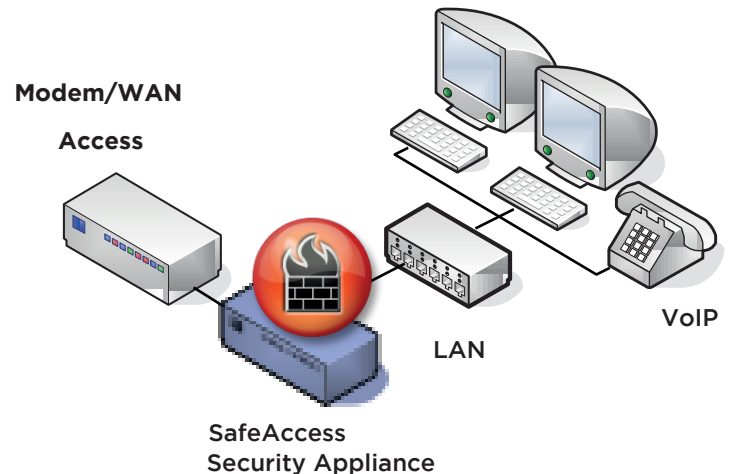

Some features such as Layer7 based QoS and firewall rules may require RAM or CPU upgrades. Please contact us for a customized quote based on requirements.

Custom SafeAccess applications may not include all features.

Model

Actual product may be different based on custom solution or selected features
